HOW TO USE BEAD PEN

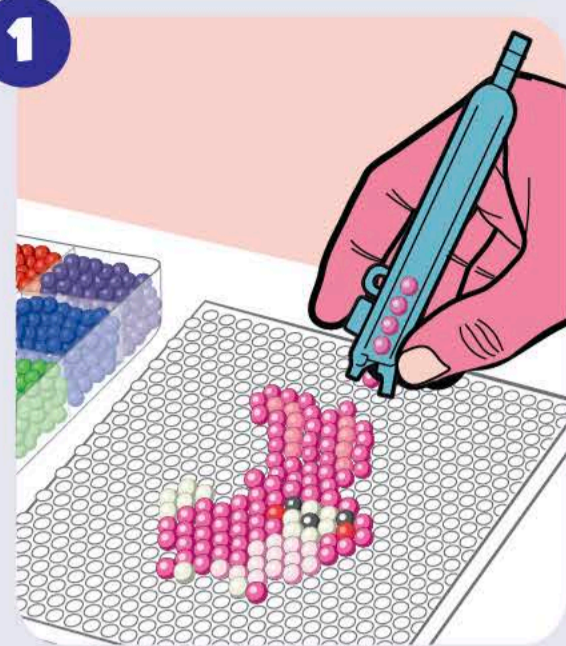

HOW TO USE SPRAY BOTTLE

DESIGN & FUSE

Work on a dry surface. Keep beads and tools away from moisture!

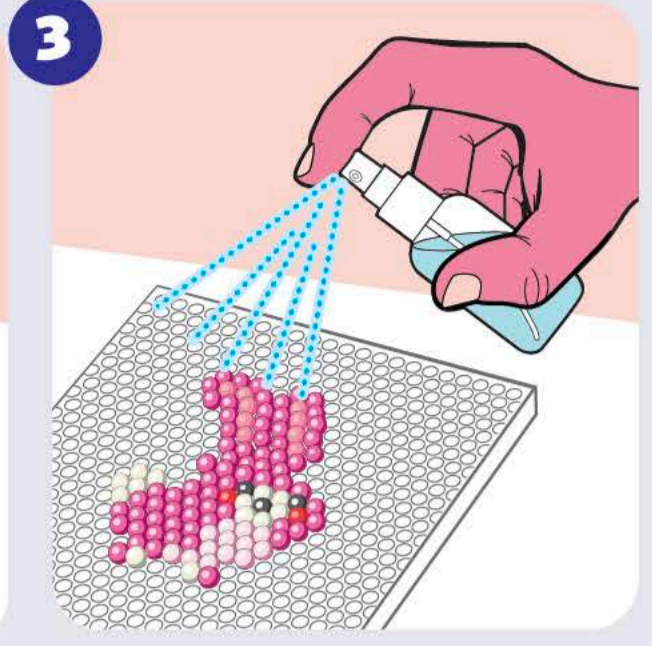

NEED AN IDEA TO MAKE? SEE TEMPLATE SHEET!

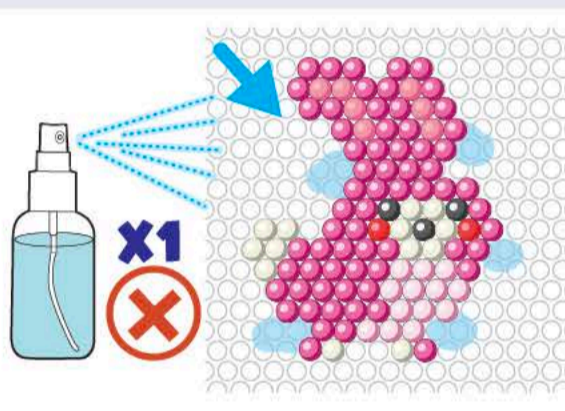

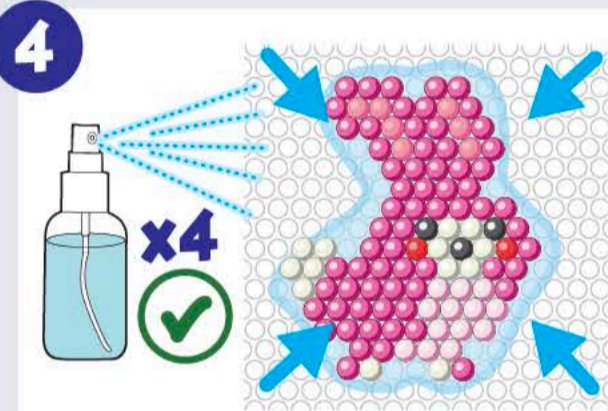

Use pen, tweezers or fingers to lay out beads on the bead board.

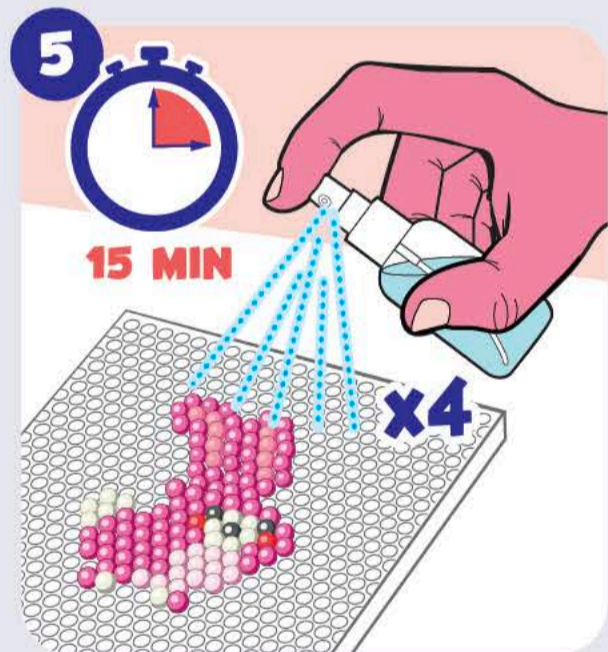

*Before spraying, close up and move bead case to protect unused beads from water.

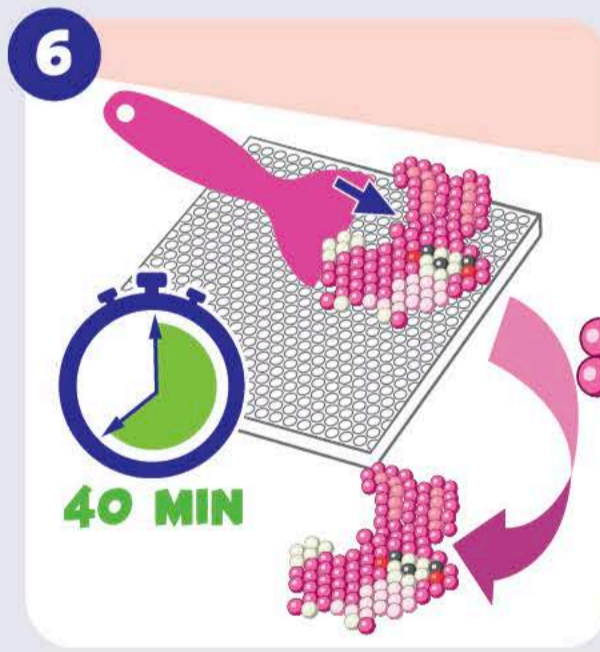

Spray beads. Cover beads thoroughly with water.

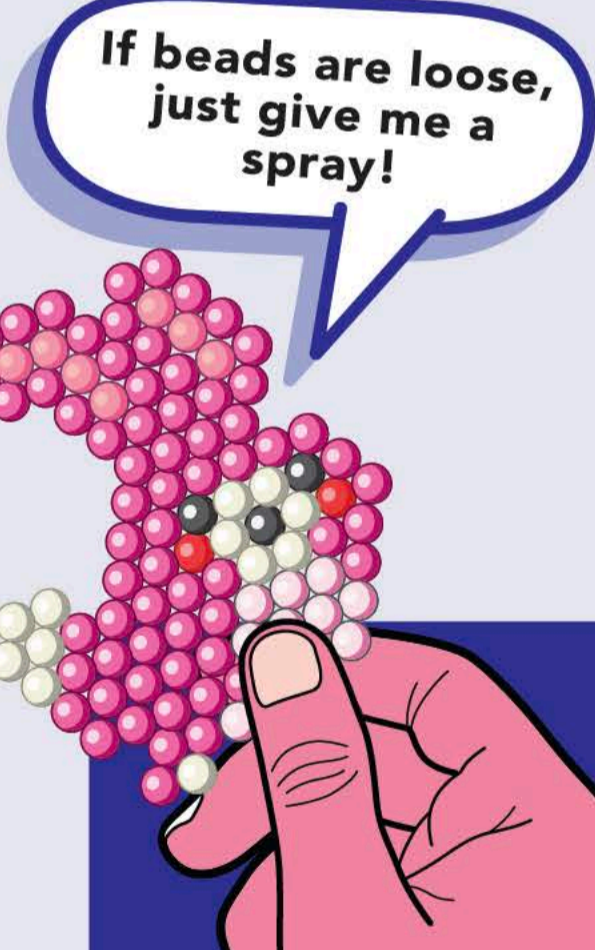

Spray beads 4 times (minimum). Spray from all sides to evenly coat. Let dry for 5 minutes.

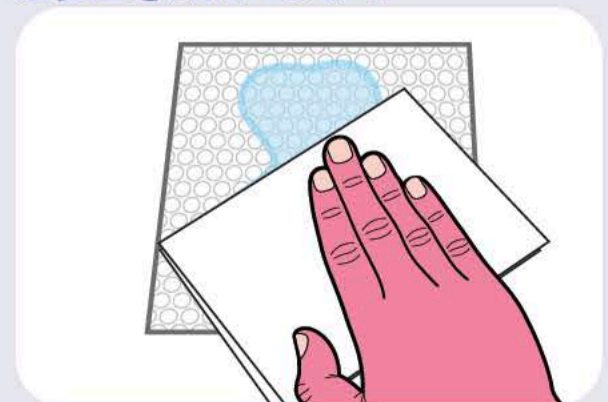

Spray beads 4 more times (minimum) until it's evenly coated. Let dry for 15 more minutes.

You can remove it from the bead tray early if the design has dried and all beads are fused. Dry time can take up to 40 minutes.

CLEAN UP!

Wipe bead board dry before creating next design.

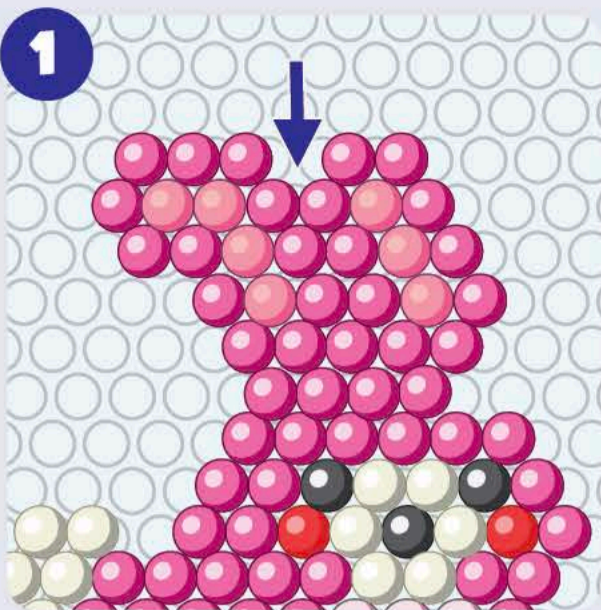

If your hands get sticky from the wet beads, wash your hands with soap and water.

TIP! Do not handle beads when they're wet!

MAKE KEYCHAIN CHARMS

Turn your design into keychains!

1 When laying out beads, pick a place on your design to attach to the keychain.

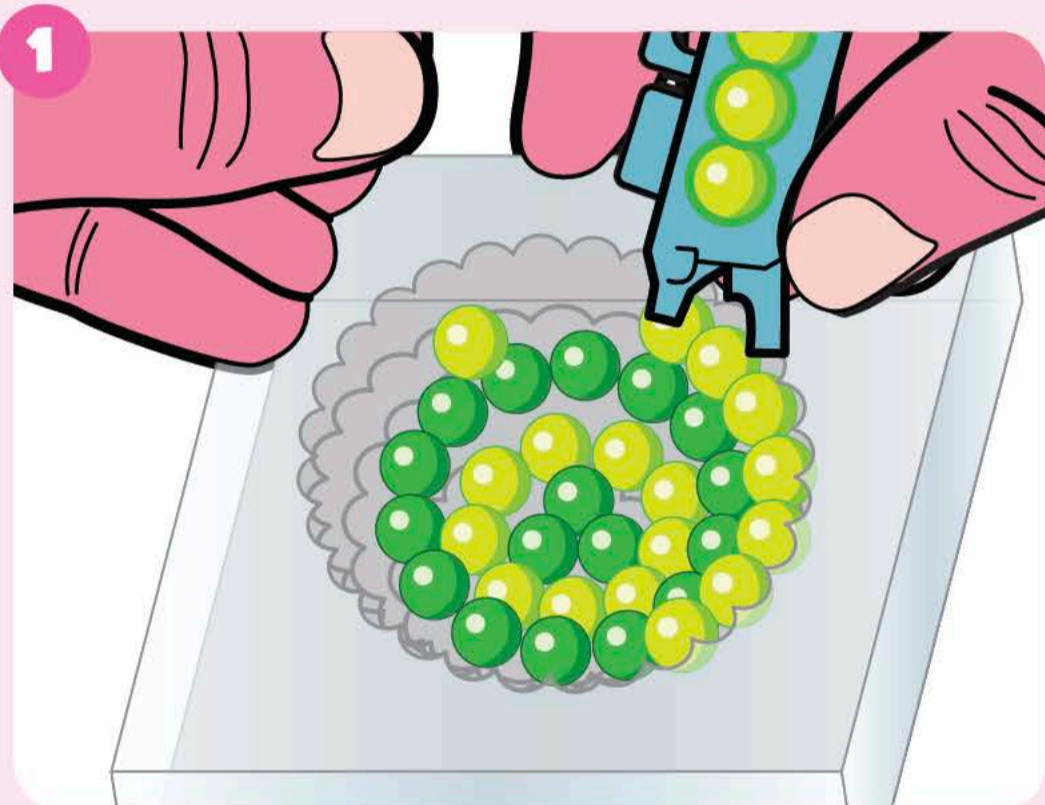

2 Before spraying, place the o-ring in the space between beads.

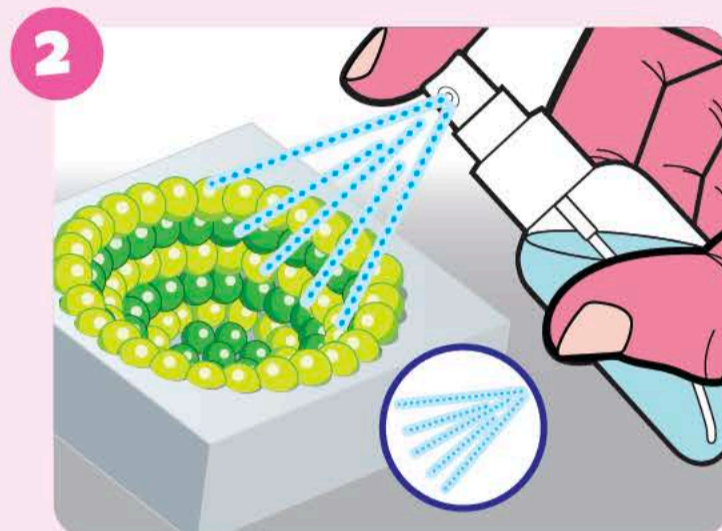

3 Hang keychain to show off your design!

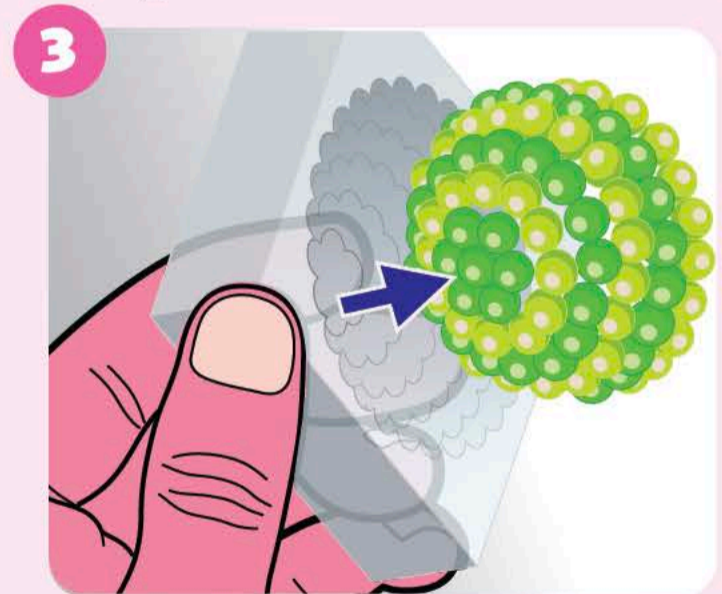

USING 3D SHAPE TRAY

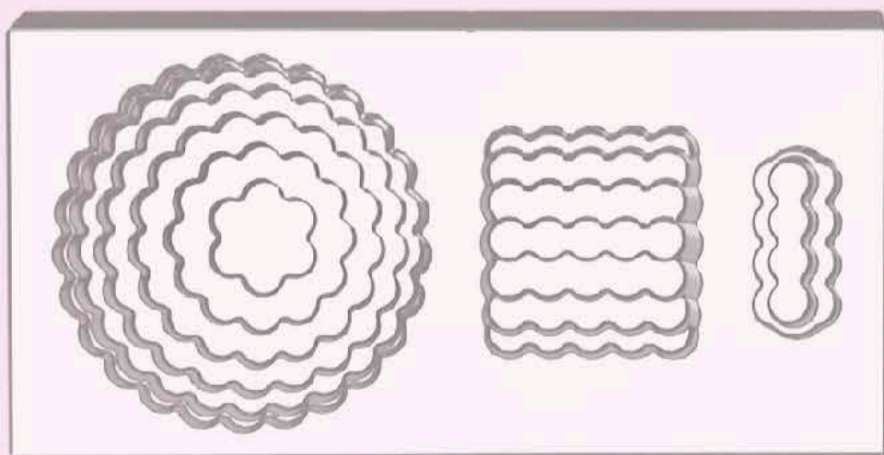

1 Use bead pen, tweezers or fingers to fill shape tray with beads.

2 Spray with water and let dry for the recommended dry times (see Design & Fuse for more details).

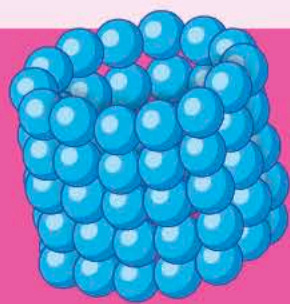

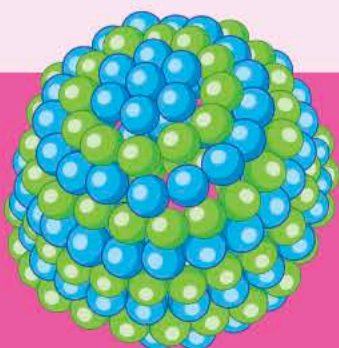

3 Press on underside of plastic tray to pop out bead shape.
